### Download PuTTY: latest release (0.78)

[Home](#) | [FAQ](#) | [Feedback](#) | [Licence](#) | [Updates](#) | [Mirrors](#) | [Keys](#) | [Links](#) | [Team](#)  
Download: [Stable](#) · [Snapshot](#) | [Docs](#) | [Changes](#) | [Wishlist](#)

This page contains download links for the latest released version of PuTTY. Currently this is 0.78, released on 2022-10-29.

When new releases come out, this page will update to contain the latest, so this is a good page to bookmark or link to. Alternatively, here is a [permanent link to the 0.78 release](#).

Release versions of PuTTY are versions we think are reasonably likely to work well. However, they are often not the most up-to-date version of the code available. If you have a problem with it already been fixed in those versions.

#### Package files

You probably want one of these. They include versions of all the PuTTY utilities (except the new and slightly experimental Windows pterm).

**Bug:** this installer was built differently to other versions, in a way that causes trouble for upgrades (among other problems) – see the [bug record](#) for details. To avoid upgrade trouble, when installing an existing version first. You can avoid the need for this (and other problems with this installer) by installing 0.78 with a special command-line invocation like:

```
msiexec.exe /i path\to\putty-64bit-0.78-installer.msi ALLUSERS=1
```

(Not sure whether you want the 32-bit or the 64-bit version? Read the [FAQ entry](#).)

We also publish the latest PuTTY installers for all Windows architectures as a free-of-charge download at the [Microsoft Store](#); they usually take a few days to appear there after we release a new version.

#### MSI ('Windows Installer')

archiu ppk  
que serà  
l'arxiu de  
credencials  
per a putty

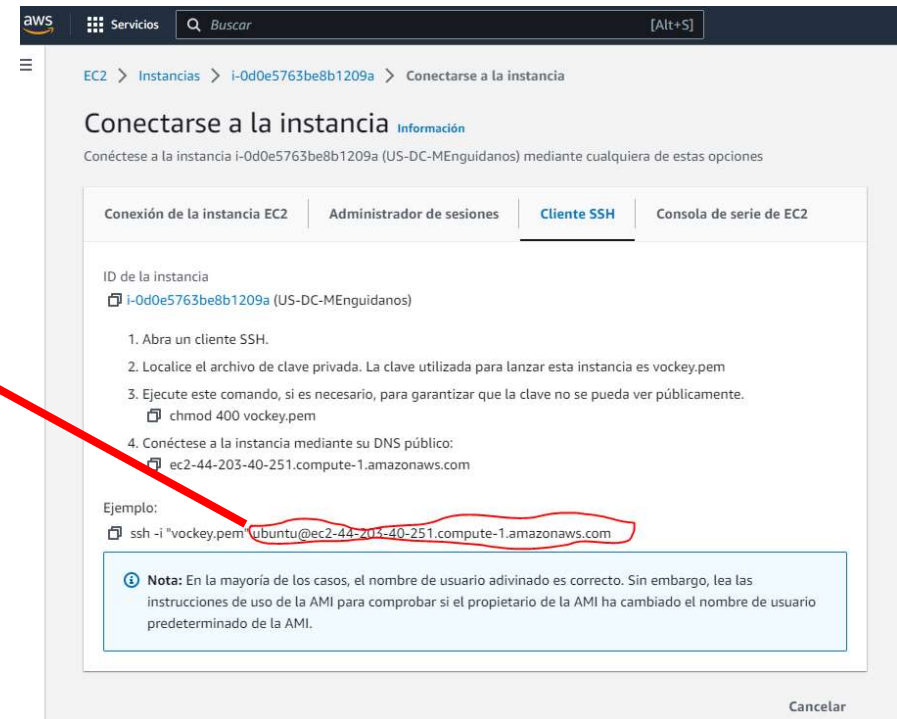

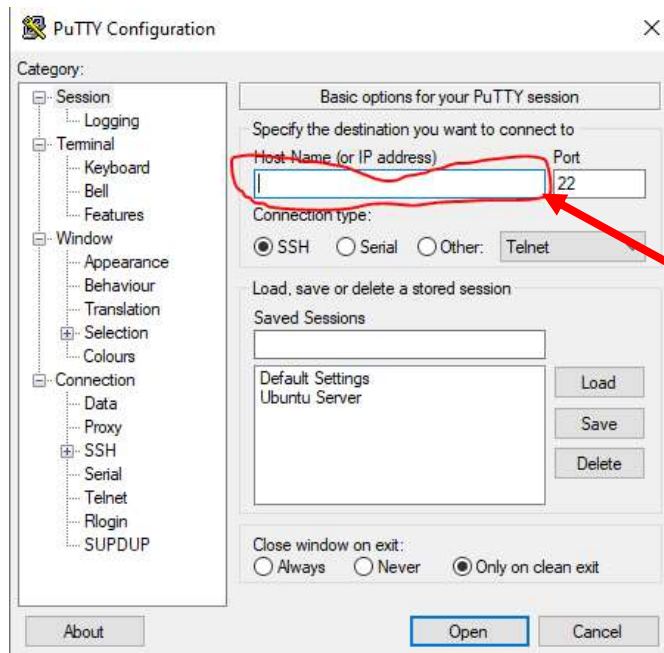

The screenshot shows the AWS Cloud Labs interface. The main terminal area displays the command prompt `ddd_v1_vu_xtkuo_954773@runweb786721:~$`. On the right, the 'Cloud Access' sidebar is visible. It includes sections for 'AWS CLI' (with a 'Show' button), 'Cloud Labs' (showing session time and start/end dates), and 'SSH key' (with 'Show', 'Download PEM', and 'Download PPK' buttons). The 'Download PPK' button is circled in red, and a red arrow points from the text on the left towards it. Below the sidebar, a table shows the AWS Account ID and Region.

AWSAccountid	697699730955
